

Kason Electronic Technology Co., Ltd Product Catalog

Shenzhen Kason Electronic Technology Co., Ltd. is a specialized company that focuses on providing industrial control accessories for electrical equipment. With a strong emphasis on quality and reliability, we aim to meet the diverse needs of our customers in the field of industrial automation. Our company has a team of experienced professionals who are well-versed in the latest technologies and trends in industrial control.

We are committed to delivering innovative solutions that enhance operational efficiency and ensure optimal performance of electrical equipment.

**12 YEARS OF
INDUSTRIAL CONTROL
EXPERIENCE**

Always bring the best quality service to our customers

Automation Control Systems

PLC (Programmable Logic Controller)

Function: Controls machinery and production lines according to program instructions.

Features: High reliability, easy programming, strong expandability.

Applications: Automated production lines, process control.

Industrial Sensors

Function: Senses and provides feedback on equipment status. **Features:** High precision, fast response, harsh environment adaptability.

Applications: Robotics control, smart manufacturing, equipment monitoring.

Actuators

Function: Performs mechanical actions based on control signals. **Features:** Compact structure, rapid response, low power consumption.

Applications: Automated production lines, material handling.

Human-Machine Interface (HMI)

Function: Provides an interface for human-machine interaction. **Features:** User-friendly touchscreen, easy to operate. **Applications:** Industrial control, process monitoring, equipment management.

Low-Voltage Electrical Transmission Accessories

We offer comprehensive low-voltage electrical transmission solutions. Our components are efficient, safe, and reliable. Whether it's improving energy efficiency or ensuring long-term equipment reliability, our products are here to help.

Variable Frequency Drive (VFD)

Function: Controls motor speed by adjusting electrical supply frequency.

Features: Energy-efficient, smooth start-up.

Applications: Fans, pumps, elevators, motor control.

Motor Controllers

Function: Controls the start/stop, direction, and speed of electric motors.

Features: High reliability, overload protection. **Applications:** Production lines, power systems.

Circuit Breakers

Function: Prevents electrical equipment damage from short circuits or overloads.

Features: Fast response, strong protection.

Applications: Power distribution systems, industrial control equipment.

Contactors

Function: Used for remotely controlling the opening and closing of circuits.

Features: Durable, reliable.

Applications: Power control, automation equipment, industrial machinery.
